

Lesson 6

READ THESE SENTENCES

Read to yourself, then read aloud with good phrasing.

- 1. Homophones are two words that make the same sound, such as night and knight.**
- 2. Biomedical researchers at biotech firms hope to develop new biotherapies.**
- 3. The telemarketing techniques used to sell biodegradable phonograph records were unsuccessful.**
- 4. Arthroscopic surgery allows doctors to look at joints that have arthritis, and then fix those joints.**
- 5. To prevent biological warfare, geopolitical concerns of small third-world countries must be taken into consideration.**
- 6. Dictaphones have made stenographers obsolete everywhere except in the courtroom.**
- 7. During a biopsy, the doctor used microsurgical techniques to extract some living cells from his patient's tumor.**
- 8. Graph means to write, but gram means what is written down, so a phonogram is the way a sound in our language is written down.**
