Mike's Helmet

Mike rushed out of the house and jumped on his bike. He didn't put on his helmet. That was a big mistake. Mike hit a bump at the side of the driveway. The bike flipped and Mike was tossed off. He hit a concrete wall.

Mike was very dizzy, so his Mom called 911. Mike began to vomit. At the hospital, Mike was told that he had a concussion to his brain. He was lucky to be alive.

Most children use helmets when they ride a bike. They know that a helmet can save their life.
