

## Lesson 4

## READ THIS STORY #2, Advanced

**More About Whales**

**The Humpback whale is the most playful and acrobatic of the big whales. If you are very attentive and lucky, you may see one.**

**They are not aggressive animals. You can get quite close to a whale. But rarely do you see the entire animal, unless it jumps all the way up.**

**A whale comes up to exhale and inhale air through his blow hole. When he takes a dive, his blow hole will close.**

**Whales sing repetitive songs. People who study whales have made tapes of them. They think whales communicate by singing their expressive songs.**
